

Plywood reels

THE ALTERNATIVE TO YOUR 500, 600, AND 800 DRUMS

Discover the advantages of
using plywood reels:

- + LOWER COST
- + EASIER HANDLING
- + MORE ECOLOGICAL

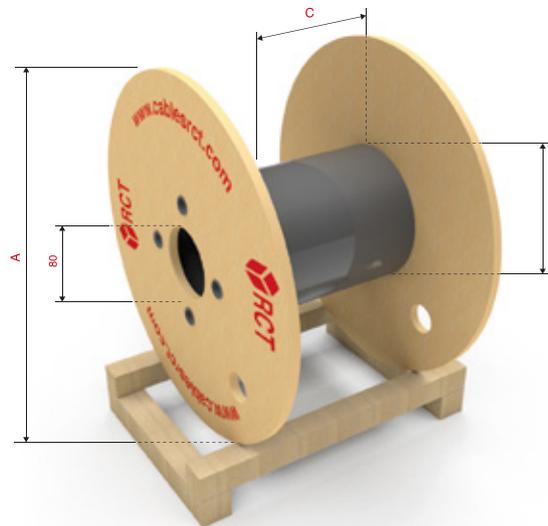

3 important reasons to choose the plywood reel on the market

Plywood reels have the same capacity as traditional drums and they are suitable for use with thinner cables. Despite their lightweight construction, our tests have shown that the life span of plywood reels is more than satisfactory.

Since they were first released, we have put more than 60,000 plywood reels on the market, and they have been very well-received by our customers

+ LOWER COST

We work with plywood reels the same as with traditional drums, so you can return them to any Cables RCT location.

Why choose plywood reels?

For narrower cables, 500, 600 and 800 drums are the perfect transport system, as you can see in the table below.

Drum	A	B	C	Volume	Cradle
400L	400 mm	160 mm	250 mm	23 dm ³	No
500L	500 mm	160 mm	365 mm	58 dm ³	Yes
600L	600 mm	160 mm	466 mm	113 dm ³	Yes
800L	800 mm	315 mm	466 mm	174 dm ³	Yes

1

If the drums are not returned to us, the savings is clear, because the price of the plywood reels is much lower, reducing the cost by more than 60%.

2

If the drums are returned to Cables RCT, the savings is generated by the lower purchase price, because the logistics requirements for the customer are similar to the case of traditional drums.

3

Traditional drums are normally refunded with a demerit of at least 20%.

Plywood reels in good condition are refunded 100% with shipping prepaid or if delivered to any of the Cables RCT locations.

+ EASIER HANDLING

Plywood reels are specially constructed with the lightest materials, which makes them easier and more comfortable to handle.

You'll notice the difference with respect to traditional drums during day-to-day storage and transport.

+ MORE ECOLOGICAL

The same environmental legislation applies to plywood reels as to traditional drums, which means that they conform to 100% of the requirements.

Also, since they have been treated for tropical climates, they are perfectly suitable for exports.

Plywood reels are individually tagged to facilitate tracking and management.
